

# Capture your life in detail with the Nokia N86 8MP

## Nokia N86 8MP

When Nokia set out to make the best mobile imaging device, it combined wide-angle Carl Zeiss optics and an 8 megapixel sensor, resulting in performance comparable to a stand-alone digital camera. The Nokia N86 8MP is designed to excel in both bright and low light conditions and it's optimized for both video and still imaging. For our customers with low vision, the Nokia N86 8MP has excellent tactile keys and is compatible with the KNFB Reading technologies.
